Tsunami Grease Cleaner

Tsunami is a solvent-based degreaser used to remove red grease and other stubborn, water-repellent grease from aircraft.

Tsunami meets Boeing, Douglas, Airbus, military and AMS specifications as a general degreaser. It's safe to use on all exterior surfaces and will not craze plastic surfaces or harm rubber components like other solvent-based cleaners. It gives you the advantage of using a solvent-based cleaner without the worry of harming sensitive surfaces.

Tsunami uses the latest technology to create a zero-VOC, solvent-based formula with a high flash point to make the product safer for the environment and safer for the user than other solvent-based cleaners.

Because of its unique formula, Tsunami exceed all State and Federal VOC laws.

It is recommend to be used on tough areas of the aircraft such as the wheel wells and wing flaps to remove the most stubborn grease and baked on hydraulic fluid.

Directions

Tsunami is ready to use. Do not dilute with water prior to use.

1. Spray or brush Tsunami onto the surface and scrub with a soft brush or scouring pad.
2. Rinse with water.

NANO LIQUID TSUNAMI

2244 Faraday Ave, Ste 148, Carlsbad, CA 92008 • (760) 444-6070

Key Features

- Solvent-Based
- Dissolves even the toughest grease
